

ADD-ON CETOP SANDWICHES

Need to add an extra CETOP 3 valve in a pre-existing system?

Don't want to disturb the existing CETOP 3 subplate and all the valves and connections?

Hyteco has just the answer - simply install a Hyteco Add-on Sandwich. Easily mount these Sandwiches between either the first or last valve and the Multi-Station manifold, bolt on another valve and attach the new hoses. Very quick and very simple!! As with all our Standard Products, these Add-on Sandwiches provide the industry with the best in design innovation and product quality.

Description.

- The basic design is a Cetop3 Sandwich with an additional Cetop3 interface on one side of the sandwich.
- Internal connections allow either Parallel or Series flow path between the original top valve and the additional side mounted valve, with it's own separate A&B 3/8" BSPP Ports.

Standard Features.

- Choice of Series and Parallel internal flow paths
- Can be mounted on either end of a Multi-station manifold
- Standard height to clear most valves
- Several sandwiches and valves can be stacked
- Easy to install

Add-On Sandwich mounted on a CETOP 3 Multi Station Manifold

Add-On Sandwich with a Tank-Top CETOP 3 Sub-plate

Two Add-On Sandwiches mounted at both ends of a Multi-Station manifold

Add-On Sandwich before and after the add-on valve is bolted

ORDERING CODES

Code	Flow Path	Mounting Position*
S3P3A	Parallel	P Side
S3R3A	Parallel	T Side
S3S3A	Series	P Side
S3T3A	Series	T Side

* The mounting position relates to the existing interface and which gallery 'P' or 'T' is adjacent to the side that the add-on valve will fit.
