

DIRECT BOLT-ON MOTOR MANIFOLDS

Hyteco offers a range of bolt-on manifold assemblies to suit certain brands of hydraulic motors with common valve functions and controls

As well as the standard functions, we have many custom designs available that include innovative options and features that allow adaptability and flexibility in a range of applications.

Standard valve functions include:

- Dual cross-line relief
- Single cross-line relief
- Dual counterbalance
- Dual counterbalance with brake shuttle
- Single Solenoid on-off N/closed or N/open
- Single relief with anti-cav check

Suitable motor brands and similar include:

- Char-Lynn H&S and similar threaded ports
- Char-Lynn 2000 and similar interfaces/ports
- Danfoss OMP/R and similar interfaces

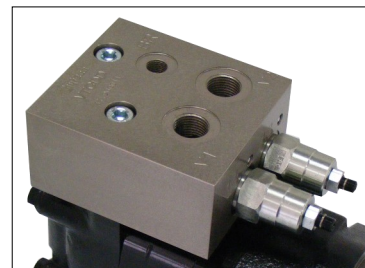

Two basic mounting styles are:

- Flat interfaces with O-ring grooves and either 2 or 4 bolt mounting holes
- Special Port Adaptors to suit threaded ports

Note:

Not all valve functions, brand and mounting styles are available in all combinations. However Hyteco can design and manufacture specific combinations to suit customer functional requirements

Like Hydraulics Orbital Torque Motors

Hyteco can also provide our popular range of Like Hydraulics orbital motors to complete the job. These are ideally suited to adapting our interface styles of Direct Bolt-on Motor Manifolds, for efficient and compact solutions.
